

Management Actions Workshop Storage Operations

ERRATA

For **Management Action 011**, “Establish partnerships to coordinate flood management structure operations,” the following fields should contain the text shown below:

1. *Capital Cost?*

“Varies depending on location and extent of construction required to develop new transitory storage (cost factors include real estate acquisitions, relocations, mitigations cost, and complexity of new facilities)”

2. *Effect on Damage to Critical Public Infrastructure?*

“May reduce flooding, therefore reducing damage to critical public infrastructure.”

3. *Effect on Floodplain and Economic Development?*

“May reduce the frequency of flooding and increases level of flood protection, which may encourage development in the floodplain.”

For **Management Action 014**, “Increase flood management flexibility by implementing conjunctive use programs at flood management reservoirs,” the following fields should contain the text shown below:

1. *Public Safety?*

“May reduce frequency of flooding and improve level of flood protection.”

2. *Redirected Hydraulic Impacts?*

“May reduce the frequency of flooding, reducing residual risk to existing development.”

3. *Climate Change Adaptability:*

“This action would enhance hydrologic adaptability by increasing water management flexibility. Implementation needs to consider impacts on biological adaptability.”
